

Creating an admin interface:

Change into the home directory:

```
cd ..
```

Create a hidden ".htpasswd":

```
htpasswd -mbc /home/pi/.htpasswd pi raspberry!
```

Create a hidden ".htaccess":

```
cd public_html
```

```
mkdir admin
```

```
cd admin
```

```
nano .htaccess
```

(edit)

```
AuthUserFile /home/pi/.htpasswd
AuthName "Please Enter Username/Password Credentials:"
AuthType Basic
Require valid-user
```

*(Control-o to write file out to disk
Control-x to exit nano editor)*
